### Talking About NZE Retrofits Language that shapes perception

PHIUS 2021 James Geppner, RetrofitNY

#### Start With The End...

... the day we must hit zero emissions.

> Days until January 1, 2050: 10,306> Retrofits in U.S. required per day: 9,023\*

#### > Retrofits required per hour: 751\*\*

\*Based on 102 million buildings (source: DOE) and 93% of existing building stock remaining in 2050. \*\*Assumes installations occurring 7 days per week and through a 12 hour workday.

#### Language is perception

#### WHAT WE SEE DEPENDS MAINLY ON WHAT WE LOOK FOR

JOHN LUSSOCK

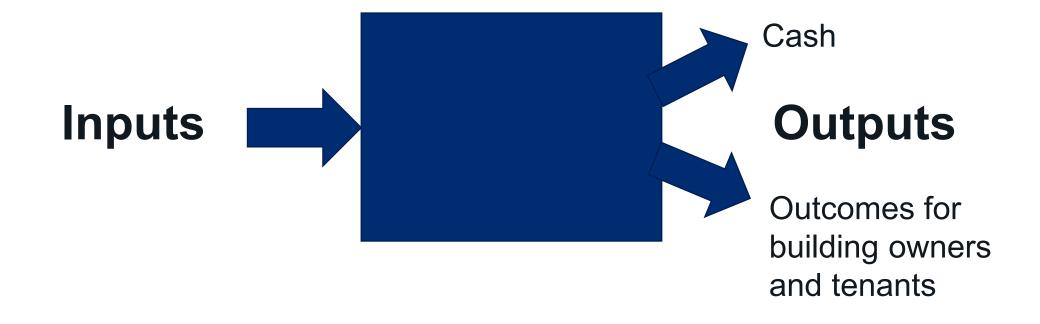

PICTURE QUOTES: corre-

and shares have been a state of the second sta

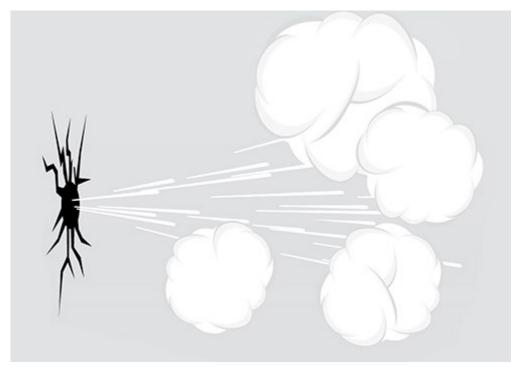

# Language can help us see things we might otherwise miss.

#### **A Different Machine**

#### Air leak

#### A loss of usable space.

A driver of energy and tenant turnover costs, and a reason why buildings are porous to noise.

Why pay for space you can't use?

#### Impaired space

## Space the owner or tenant can't fully use.

Cold near a window. A room you avoid because it's too hot in the summer. Avoiding a basement because it's damp or moldy.

Limitations on the use of a space amount to paying for a thing you will not use. What is the percentage of impaired space in a typical house or apartment?

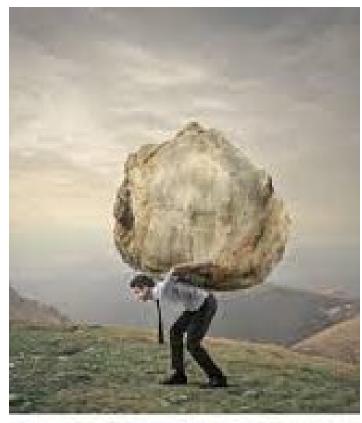

#### An oil or gas tank

# The point of sale of the building owner's competitor.

## Buying an oil or natural gas tanks or systems are investing in your competitors.

#### Avoidable costs

Tenant dollars that could go to other purposes (such as paying rent, saving money, seeing a doctor) all which benefit the tenant and the building owner.

Examples: energy costs, avoidable health costs, space heaters, dehumidifiers, etc.

shutterstock.com · 326360930

#### Outcomes

# What people want when they hand over their money. They aren't after things.

#### Adrift

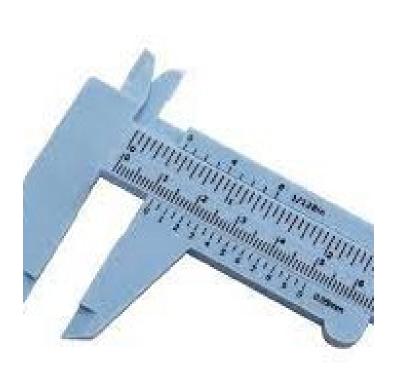

The goal upon which we fix our attention and measure our actions. With every step we can move toward it or away.

For a portfolio owner looking to the future:

- Stable returns with low risk profile
- High returns on capex (high # of unit years)
- New revenue streams
- Low asset use costs
- High tenant wallet share
- Maximum lifetime value of tenant

#### Lifetime value of tenant

A metric that moves any rise in rents, any decrease in turnover due to higher tenant satisfaction, decreases in operating costs and capital expenditures, and new revenues.

It's a metric that shows the value of a NZE building.

#### **Unit Years**

A metric that factors in the longevity of the NZE retrofit and gives the building owner a more accurate picture of what they are buying with upgrade dollars.

**Units X Time** 

#### Uncertainty

# A unique type of pain and one people go to great lengths to avoid.

#### Product

# Knowing what you're getting before you pay for it.

A high degree of confidence in the outcomes which facilitates the valuing of those outcomes.

The ability to value outcomes before making the purchase decision.

#### **Price Discovery**

# The period of uncertainty in which you wait to learn the price.

Until the customer knows the price they are in a state of uncertainty and the transaction costs are high.

#### A Decision

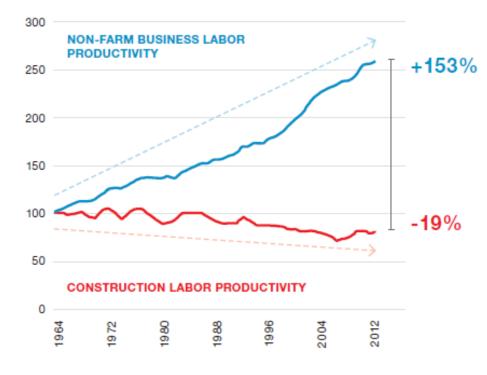

#### A prediction of the future.

A bad decision is one that fails to account for likely scenarios in the future, frequently preferring to see the past or present as stable and as perpetuating indefinitely.

#### "This Is The Way We Do Things"

#### **U.S. LABOR PRODUCTIVITY**

A defense of current and past decisions, usually without fully considering the alternatives.

#### Scale

**THINGS THAT** FEEL

**INEXPENSIVE THINGS THAT** 

**EXPENSIVE** 

possible. FEEL

A way to increase a person's buying power, their ability to get a lot for their money.

It's also a way to transmit the expertise of a person to a broader population than would otherwise be

### Strategy

# To do different things than the competitor rather than trying to do the same things better.

**Example:** 

Fee for service design firm A VERSUS Fee for service design firm B

## Strategy

Customer acquisition	Remote customer acquisition using image analysis data
Price discovery	Immediate estimate (1-3 days)
Financing	Standardized loan application and process for more efficient loan origination and underwriting, a simple financing package
Product	Consistent across buildings of a similar typology, predictable performance and attributes
Fabrication	Offsite in controlled conditions with lower labor costs, high quality control, repeatable process, greater ability to constantly improve unit economics
Delivery	Franchisee installers

#### Whole Building Retrofit Solution

#### **Outcomes:**

IAQ Performance Energy Performance Usable Space Estimated Longevity

#### **Components:**

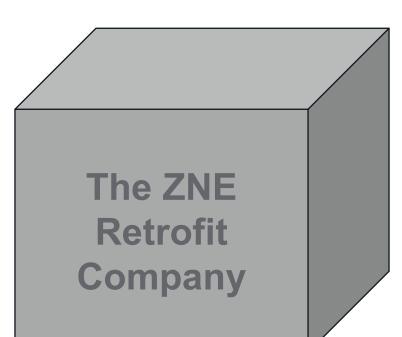

Envelope System Specifications Mechanical System Specifications Monitoring System Specifications

Price Estimate: Installation Time:

#### It's knowing what you're getting.

It's a product that reduces uncertainty for building owners, allows for scale and allows for continuous improvement and knowledge aggregation by the company behind it.

#### NZE Retrofit Company

A company that can deliver a scalable solution and increase access to the benefits of a NZE retrofit.

### **Next Steps: Action**

- > Use these terms so that we're all talking the language of change. Seek out different business models (e.g., developer designer)
- > Apply to our Solution Provider and Component Manufacturer RFQLs
- > Contact one of the qualified companies and offer your assistance
